I. Introduction

The Qassim Sustainability Research Centre is a leading academic initiative at Qassim University, dedicated to the study and promotion of environmental sustainability. Our main objective is to address current and future environmental challenges through innovative research and practical solutions that drive sustainable development in the region and beyond.

II. Research Focus

Our centre focuses on key research areas related to sustainability, including, but not limited to:

1. Conservation of Natural Resources
2. Renewable Energy and Energy Efficiency
3. Climate Change and Adaptation
4. Sustainable Water Management
5. Sustainable Agriculture and Food Security
6. Environmental Resilience and Biodiversity
7. Clean Technologies and Environmental Innovation.

III. Team and Teaching

We have a multidisciplinary team of 17 highly qualified professionals committed to excellence in research and teaching in the field of sustainability. In addition to our research activities, we also provide support and guidance in teaching postgraduate programs related to sustainability, preparing the next generation of leaders in this critical field.

The Qassim Sustainability Research Centre strives to make a significant contribution to the advancement of sustainability and environmental protection. Through collaboration with other institutions, organizations, and the community at large, we aim to create a positive and lasting impact on our society and the planet.
