Amir Al Qassim sponsors the exhibition “Innovative 2022” at Qassim University and praises the efforts of innovative students under the dome of the university
https://qu.edu.sa/content/news/2744 [32]

His Royal Highness Prince Faisal bin Mashal bin Saud bin Abdulaziz, Emir of Qassim region, sponsored on Wednesday morning, 17 October 1443, the “Innovative Exhibition 2022”, organized by Qassim University in the main lobby of the university city, in the presence of His Excellency Dr. Dr. Abdul Rahman bin Hamad Al Daoud, President of the University, and a number of directors of government agencies in the region, and agents and members of the University Council.

During the opening of the exhibition, His Highness toured the various pillars containing participations from 13 sides and 134 innovations, whose innovations and ideas can be transformed into products with economic and development returns, praising the efforts of innovative students under the dome of the university, as well as honoring the heroes of the Saudi team for science and engineering who attended the opening of the exhibition at the invitation to attend the exhibition activities from the management of Qassim University in exchange for achieving 16 major international awards in “ISF 2022”.

His Highness the Emir of Qassim region, stressed that the innovators and innovators represent an edifice of this country and proud of us and always raise the heads of the Arab and Islamic world, as his Highness congratulated the place of the custodian of the Two Holy Mosques, and his Highness crown prince - May God save them - on this great achievement “Isif”, which we saw a few days ago and what the students of the Kingdom got, pointing out that this occasion corresponds to this achievement to confirm that the bet that this country has been based on in education since the reign of the King The founder- Tayebullah Tharah, pointing out that there is much he does not know that the missions started from the days of the founder out of the Kingdom and to developed countries until we reached this achievement years later.

His Highness added that Qassim University accompanied the event with this exhibition, and the
university’s embrace of all educational bodies in such exhibitions, suggesting that His Highness be in the scientific center of Al-Qusaym in Aniza province a permanent exhibition for inventors, inventors, innovators and innovators to highlight all that the sons and daughters of the country in general and the region in particular and those inventors did for each visitor, stressing his Highness that the center has become a tourist destination and for those who want to see the development of the country, and will be a scientific and civilization interface to see all the creativity of inventors and inventors of The people of the country, blessed by His Highness to the President of the University and its employees for these efforts made in this distinguished exhibition.

His Highness also honored the participants in the exhibition: Future University, Buraida Community Colleges, Aniza Community Colleges, Saudi Intellectual Property Authority, General Foundation for Technical and Vocational Training in Qassim, King Abdulaziz Foundation and his men for talent and creativity, in addition to the Department of Education of Qassim region, and the Department of Education Aniza Governorate, The Department of Education of Al-Comet Province, the Department of Education of The Province of Bakiria, and the Qassim Scientific Center, as well as honoring a number of creators who received local and international awards at the university during 2020 to 2022, in addition to honoring The smallest innovator and innovator participated in the exhibition.

For his part, His Excellency Dr. Abdul Rahman bin Hamad Al Daoud, President of the University, noted the support of the University of Good Leadership - May God save it - which has spared no effort in supporting innovation and innovators, and pumping more innovative projects within the national economy, to achieve sustainable development, empower innovators and talented distinguished in the fields of science and technology, pointing out that this exhibition is one of the initiatives of the University in spreading the culture of innovation, discovering innovators and innovators in the region, enhancing talent, and refining experiences and creativity, including it complies with the pillars of the Human Capacity Development Program, by preparing students to compete in national and international forums.

Al Daoud added that this exhibition represents a stage of catalysis for a continuous effort that lasted more than eight months, and targeted the university in more than eleven educational sectors in the region and culminated in the expertise and support of the institutions concerned in this field in the country, such as: The King Abdulaziz Foundation and his men of talent and creativity, and the Saudi Intellectual Property Authority, pointing out that the number of innovations submitted reached 320 innovations, and exceeded the number of innovators 938 innovators and innovators, and adopted 134 innovations after evaluation and trade-off.

The President stressed that the continued support received by the University from our good government and the follow-up of His Highness the Emir of the region, and the efforts of colleagues, colleagues and university students has had a significant impact on the university’s recent achievement of a number of awards and advanced centers locally and internationally, most notably progressing its ranking in innovation to become (426 globally according to skimago classification, and obtaining two medals at the Geneva Innovation Fair, in addition to obtaining first place in the challenge of university innovation at the level of Saudi public and private universities and qualifying to participate in the In the Babson School of Business program in the United States of America, it has won a number of projects and innovations at the level of Saudi universities under the auspices of the General Authority for Small and Medium Enterprises (ENTERPRISES).
Al Daoud explained that the university invited the sons and daughters of the nation winners and winners of a number of awards at the International Isif Exhibition to attend this exhibition and honor them in recognition of these creators, congratulating them on this occasion and blessings to our good government and our dear country and these heroes this global achievement, and welcome permanent members of the university, and thanked His Highness the Emir of the region for honoring the exhibition and encouraging innovators and talented people, as well as thanking participants from all educational and training bodies, and the organizers of the exhibition, wishing everyone all the best and creativity.

This exhibition aims to achieve the objectives of the Ministry of Education for 2022, by promoting talent, innovation, refining experiences and creativity, keeping pace with national trends in accordance with The Kingdom's Vision 2030, as well as the aspirations of the Ministry of Education, highlighting the university's leading role in spreading knowledge and enabling innovation, as well as promoting basic and future skills in accordance with the pillars of the Human Capacity Development Program, encouraging students to highlight their scientific innovations, and preparing students to participate in competition in national forums. To connect, and to provide the opportunity to get to know the creators and innovators in the Qassim region.

The exhibition also included a number of enriching programs and workshops for talented and innovative people on the role of Saudi Arabia in developing and supporting talent and innovations and the role of innovators towards their homeland, as well as a consulting corner to provide quality advice in the field of talent and innovation, in addition to reviewing the experiences of innovators through dialogue sessions where innovators from several fields meet to showcase their experiences and experiences.

The University concludes its fourth exhibition «The Art of the Possible in the Application of E-Learning»

The university, represented by the Faculty of Science and Literature in Riyadh al-Experts Governorate, in collaboration with the Deanship of E-Learning and Distance Education, concluded the fourth exhibition of e-learning, entitled “The Art of the Possible in the Application of E-Learning”, on Monday and Tuesday, at the Prince Sultan Bin Abdul Aziz Cultural Center.

The exhibition was opened by His Excellency Dr. Abdul Rahman Al Daoud, President of the University, who praised the outstanding ideas and works included in the exhibition that contribute to the formation of an interactive environment stimulating learning and creativity, in the presence of H.E. The University's Undersecretary for Educational Affairs Dr. Mohammed Al-Sharkh, the General Supervisor of the Western Academic Complex Dr. Ali Al-Aqal, and a number of deans.

The exhibition included 24 entries and contained seven key pillars, including a corner of Saudi Arabia's e-learning achievements during the Corona Pandemic (Qassim University Success Story), a Blackboard Learning Management System Corner, a Zoom Platform Corner, a Corner of Educational Applications and E-Learning, a Social Communication and E-Learning Corner, an e-learning and community service corner, as well as a corner entitled Electronic Applications for Your Health.

Dr. Aisha Al-Batah, Dean of the Faculty of Science and Literature in Riyadh, explained that the Faculty of Science and Literature in Riyadh al-Experts used to hold e-learning exhibitions, with the aim of promoting
and spreading the culture of e-learning, identifying the most important innovations that contribute to the quality of the educational process at our university, and emphasizing keeping pace with the times in the applications of modern e-learning.

Al-Batah pointed out that the art exhibition possible in the application of e-learning 4, came different this time, presenting the success story of Qassim University during the Corona pandemic and its excellence in e-learning and facing the challenges that emerged during that pandemic.

Dentistry at the university organizes scientific research day
https://qu.edu.sa/content/news/2725 [34]

The university, represented by the Faculty of Dentistry, held the annual Scientific Research Day of the University's Faculty of Dentistry, which will be held in collaboration with the Saudi section of the World Dental Research Organization from March 28-29, 2022 at the University Medical City Theater, which includes research presentations by college students and doctors of excellence.

The events include the presentation of 75 original papers in various branches of dentistry prepared by fifth-year students and excellence doctors at the college, supervised by faculty members of the college, most of which are ready for publication in various scientific journals, and lectures will be held on the sidelines of the events by selected speakers from inside and outside the college, with the aim of enhancing the research capabilities of students and excellence doctors and presenting employment opportunities and options for college graduates.

For his part, His Excellency Dr. Zafer Al Asmari, Dean of the Faculty of Dentistry at the University, explained that the aim of this event is to be an appropriate platform for college students and doctors of excellence to highlight their outstanding research, exchange ideas and strengthen the bonds of fellowship and cooperation between them, as well as to create a climate for them to move to greater horizons of research excellence and creativity at the local and international levels, thanking the President of the University for his care for this event and for his continued support to his sons doctors of excellence and students and all that would raise the university and develop it.

Dr. Murad al-Rashidi, Head of the Student Research and Presentations Unit and the Excellence Physician Supervision Unit, said the event was organized as part of the fruitful cooperation between the College and the Saudi section of the World Dental Research Organization and aims to promote and enrich research activity in the field of dentistry in the Kingdom.
With the participation of students from 22 universities. The university holds the attainment measurement test in its 14th session for medical students
https://qu.edu.sa/content/news/2707 [35]

The University, represented by the Faculty of Medicine, on Wednesday, 29 July 1443, held the attainment measurement test in its 14th session, which has been held by the College since 2012 at the level of medical students in the Kingdom and the Gulf each year, where the test aims to measure the educational level of medical students at various stages based on the criteria of measuring the competence of medical graduates in what is known as “Saudi Aids”, and participates in the preparation of a group of professors of the Faculty of Medicine at the university.

The number of students participating in this year’s test was approximately 10,000 students from 22 universities, including nearly 5,000 students who performed the remote test through a distinguished partnership between the Faculty of Medicine and the Deanship of Information Technology, which was able to provide the necessary capabilities and techniques for conducting remote testing for this number of students at the level of universities in the Kingdom, thus exceeding the number of participants in this test since its inception 67 thousand students from various universities.

University volunteer dental convoys treat 547 cases at Dome Center
https://qu.edu.sa/content/news/2688 [36]

The voluntary dental convoys at the University's Faculty of Dentistry, in cooperation with the Deanship of Community Service, organized their 29th convoy, which went to the Dome Center on Sunday morning, 20 June 1443, and provided services to beneficiaries until Thursday, 24 June 1443, at the Qubba Celebration Centre, as part of the university's initiative to activate the campaign of His Highness the Emir of Qassim region, “I am a Saudi, I cherish my identity”.

The convoy was attended by 191 volunteers, consultants, specialists, doctors, doctors, students and students, and the services provided by the convoy within 5 days included the opening of a file and the treatment of 547 references and reviews in various clinics for men and women, which contained clinics in the following specialties: (2 detection clinics, filling clinic, paediatric dentistry, surgery and gum treatment) in a total of 18 clinics.

The convoy also included an educational aspect to raise community awareness about dental diseases and ways to prevent them, where a number of 7 schools were visited and provided awareness and education services to 639 students, and took consultations and raised awareness about dental problems among students.

Dr. Zafer al-Asmari, Dean of the Faculty of Dentistry, said the convoy is part of the university's initiative to activate the campaign of His Highness the Emir of Qassim region to promote the national identity of “I am a Saudi who cherishes my identity”, noting that it is an extension of the series of voluntary
caravans carried out by the college as part of the volunteer dental caravans program, which aims to provide voluntary dental services to remote areas of Qassim to promote oral and dental health.

Al-Asmari said these convoys provide outstanding therapeutic and awareness services to members of the community, in accordance with international quality standards, and contribute to spreading the culture of volunteerism among students, and work to prepare a generation of creative dentists in the field of volunteer work, where the number of convoys conducted by the program to date has reached 29 convoys, and the number of beneficiaries of its services more than 35,000 beneficiaries, and the participation of more than 1000 volunteers.

Under the auspices of His Highness the Prince of Qassim. The university celebrates National Day 91 with the main lobby of the university city

https://qu.edu.sa/content/news/2625

His Royal Highness Prince Faisal bin Mashal bin Saud bin Abdulaziz, Prince of Qassim region, praised the university's achievements that follow day after day, stressing that he is aware of all the achievements of the university and the achievements it is witnessing, expressing his happiness with these achievements, which are not strange to the university under the leadership of His Excellency the President of the University and its employees, and said that His Highness is proud of what the university has achieved in international organizations and educational bodies.

This came during his speech at the university's celebration on the occasion of the 91st National Day, which was held on Monday, February 19, 1443, in the presence of His Excellency Dr. Abdul Rahman bin Hamad Al Daoud, H.E. University Agents and Deans of Colleges and Support Deans, in the main lobby of the university city.

His Highness pointed out that there can be no achievement unless there is a security in which the citizen participates, being the first security man, adding that when the regulations of the state and participation in social security are adhered to, and away from provoking public opinion, because security and stability are the basis in the development of this country, he added that the national day is that we firmly believe in the importance of the country first and last, and we are all one Saudi family joining hands and cooperating on the achievement, thanking the President of the University and its employees for celebrating On this day, which embodies the unity of hearts and the sense of grace we live in.

For his part, His Excellency Dr. Abdul Rahman Al-Daoud, President of Qassim University, stressed that the occasion of the National Day is precious and dear to all of us, where we celebrate our country on its glorious day 91, Hamedin and thank God for the security and safety he has bestowed upon us and Development and prosperity, and wise and rational leadership, so that our precious kingdom, God willing, will remain as long as life remains, and the tongue of our state repeats "We have a house", since it laid its foundations and united king Abdulaziz Al Saud, god bless him, and completed the march from After him his sons of kings, may God rest their soul, until our time, led by the custodian of the Two Holy Mosques, King Salman bin Abdulaziz, and assisted by His Highness the Crown Prince Mohammed bin Salman, may God save them.

Daoud urged university students to sense this important historical dimension of their country, to know the truth about this prosperity, development and prosperity they live on this pure land, to preserve its gains and seek to defend it, and to raise its status locally and globally, He said: We are beginning to see the results of the clear vision that our country is moving with a thoughtful balance based on the guidance of our wise leadership, the minds of the sons and daughters of the nation, their efforts and theirtenders;

His Excellency the President of the University explained that the successes achieved by our good government in dealing with the Corona pandemic is a present proof of the wisdom and skill of our leadership in managing this crisis to control this pandemic, and the sacrifices made by the men of this giving country and its women, all of which were a reason, after god's success, in our superiority over developed countries towards controlling this pandemic, and the daily statistics are only a testament to
this excellence and statesmanship.

Daoud expressed his pride and colleagues and fellows from the university staff with the university's honorable results at the scientific, research and community service level, where the university received the highest category in the evaluation of stars from the international organization QS classification for its academic excellence, and renewed the university's institutional accreditation until 2027 as the third Saudi university to achieve this achievement, in addition to entering the ranking of emerging international universities achieved advanced rank according to the international times classification, in addition to its presence in the distinguished research in the oldest Global publishing vessels, launching their strategic plan for the next 10 years.

He added that the University also received the award of government electronic transactions at the level of the Kingdom, and entered in many international classifications in excess of 15 international classifications, and the university is the second university in the Kingdom in terms of the number of educational programs approved, with twenty-three nationally accredited programs, sixteen international programs, in addition to twenty-eight programs under accreditation, and the University has many international recognitions and accreditations from international bodies American and European, and many international and local achievements in excess of Thirty-five international and local achievements, some of which were achieved by university students, and yesterday the university honored its achievement with two Saudi universities high percentage and advanced position in the results of measuring functional association one of the participatory initiatives with the Ministry of Human Resources and Social Development.

Al-Daoud stressed that these achievements would not have been achieved without Tawfiq Allah, and then the unlimited support received by the university from our good government and his Highness Amir Al Qassim and His Highness his deputy, and from his Excellency the Minister of Education, and the efforts of the makers of success of colleagues and colleagues each in his position, thanking His Highness Amir Al Qassim for his honoring of the ceremony and his support and continuous encouragement, as well as thanking the organizing committee of the ceremony led by His Excellency the Vice Chancellor for Educational Affairs Dr. Mohammed bin Fahd Al-Sharkh and all members of the committee representatives of different departments. At the university, he asked God to preserve this country, its leadership and its people from all evil and evil, and to perpetuate the grace of security and safety, and to support our soldiers and mercy their dead and heal their wounded.

The university ceremony included several paragraphs where he began to play the royal peace, and then read verses from the Holy Quran, and then began the paragraphs of the ceremony through a national poem, a national operetta, and a visual presentation produced by the General Department of Information and Communication tells the journey of education from the booklets to distance learning in the Kingdom, and at the end of the ceremony honored his Highness the former deans of colleges and deans who ended their mandate, after which his Highness the Emir of the region and his Excellency the President of the University and agents and deans of the colleges participated in the Saudi offer.

His Highness also opened the accompanying student exhibition, and toured within its pillars containing 17 paintings (corner) that tell the history of the First, Second and Third Saudi State, and the most important achievements of the kings of Saudi Arabia since its founding to this day, in addition to a presentation of the most prominent aspects of vision 2030, the most prominent projects of Saudi Arabia, and the efforts of the Kingdom in the face of the Corona pandemic, as well as the exhibition was interested in allocating a corner for the digital transformation of the Kingdom and the most prominent applications, and the corner of the last efforts of the University with grant students, and the efforts of
the Kingdom in the service of the guests of Rahman, and visiting the servant of the Two Holy Mosques King Salman bin Abdul Aziz of Qassim region, in addition to a special participation of the Club for the Disabled to express the love of the homeland in sign language, and participation of painters in an art exhibition of painting with drawings containing 35 special drawings of the kings of the Kingdom since its founding, and with the participation of 55 students in the exhibition.

After that, His Highness visited the Deanship of Community Service exhibition at the University and launched the initiative of Qassim University to activate the campaign launched by His Highness under the slogan “I am a Saudi I cherish my identity”, where the university initiative includes 60 diverse programs including: 20 programs for national values and 20 for the Arabic language, including 20 for popular events, where His Highness launched a number of qualitative initiatives, the first initiative, the umrah program for families of martyrs of duty in Qassim region, the second initiative Qassim Walking, a program that promotes the culture of personal sports in all spectral The third initiative is the Football League between government departments in Qassim region and this aims to move young people in Qassim region in the umbrella of sports and the fourth initiative consulting and courses, an initiative based on responding to the needs of all government departments of quality courses as well as providing legal and medical consultations.
